

Dear Parents and Carers,

We will be holding a science week commencing Monday 5th December based on the theme of celebrations. During this week the children will be involved in carrying out a range of experiments and hands on activities.

FAMILY CHALLENGE - BUILD A ROCKET FOR CHRISTMAS!!

We are inviting you to join in our science week by building a rocket. We will be joining together after school on Thursday 8th December to award prizes and test any working models. All entrants will receive a prize ... so give it a go!

If you have time for a family day out you could take a trip to the Museum of Science and Industry where the children can take part in a range of experiments free of charge or take a festive trip on a steam train.* If you fancy travelling a little further you could venture up to Halifax and visit the award winning museum, Eureka, where the children can take a trip to the North Pole.* Alternatively you could visit Jodrell Bank to do some star gazing.*

If you have any questions please contact Emma Easmon on admin@beaverroad-pri.manchester.sch.uk

We hope that you all enjoy the week.
