

# WHAT HAPPENS TO THE FOOD WE EAT?

In Y4 this term, we will be exploring a new Science learning challenge: What happens to the food we eat? This home learning grid includes learning opportunities that will complement what you will be doing in class. In the top left section, you will see an 'Every week' box. These activities must be completed weekly and will be monitored in school. In the other boxes, you will find activities which link to this term's learning and are optional. We would love to see any work you do posted onto [Seesaw](#). You can also bring in any work you complete to display in your classroom or share in our weekly year group assembly.

## Every week

**Reading:** you should be reading your book **daily** for 10-15 minutes.

Please post at least one update a week of your reading at home. This could be a picture of the text you have read with some notes, a voice recording of you reading or a video.

**Spellings:** these are updated every Friday on EdShed, where you will find lots of fun activities to help you practice.

**Mangahigh:** you will be assigned a weekly Mangahigh activity linked to our Maths learning.

**Times Tables Rock Stars:** work on improving your *Soundcheck* score to develop quick recall of all 12x12 facts.

**Lexia:** available at home if your child has access to this in school.

*Click on the logo of each app for a direct link to relevant site.*

## Reading

Log into your Oxford Reading Buddy account and choose a book to read. Your book will have comprehension questions to answer. Additional guidance for reading at home can be found [here](#).

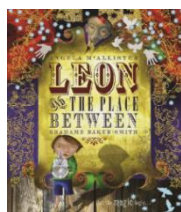

With a great link to our topic, we have been looking at a book called Gut Garden, written and illustrated by Katie Brosnon.

## Writing

We launched our new literacy unit with a trip to the circus inspired by Leon and The Place Between. Why not have a go at writing your own version of this imaginative fantasy story.

Click on the QR code to have a look at story map based on the story that might help.

## Speaking and Listening

Click on the image to have a listen to our Y4 song this term **Food groups are rockin' tonight**.

Have a go at performing your own version at home!

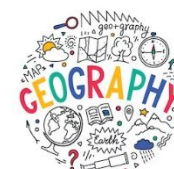

## Geography

Use a map to locate different countries and continents. *What interesting information can you find out?*

*Can you think of a good way of presenting this digitally by trying to incorporate some Computing skills?*

## Science

As part of Science this term we will be setting up an investigation looking at the effect of different liquids on teeth.

Click on the image to watch a short YouTube clip from The Dad Lab for inspiration to set up your own investigation at home. *What observations could you make? How could you present your results?*

## Spanish

Scan the QR codes to have a go at some games linked to our new Spanish unit: family members; parts of the face; describing a face.

## Get active

Explore lots of our favourite brain breaks on GoNoodle.
