# Your Pentagon Consultant

Dan Young

I studied Kinesiology while at Western New Mexico University on a Golf and Cross-Country scholarship. After living in the Wild West for 5 years, I found myself dreaming up places to fit the wide-open spaces, my role at Pentagon has allowed me to do just that. I love going into a school and seeing all the wonderful possibilities of a playground unfold before my eyes. From the initial consultation to designing a bespoke space and seeing the project through until the end. I feel as though the Pentagon team really changes lives.
